Klasifikace evropských zemí

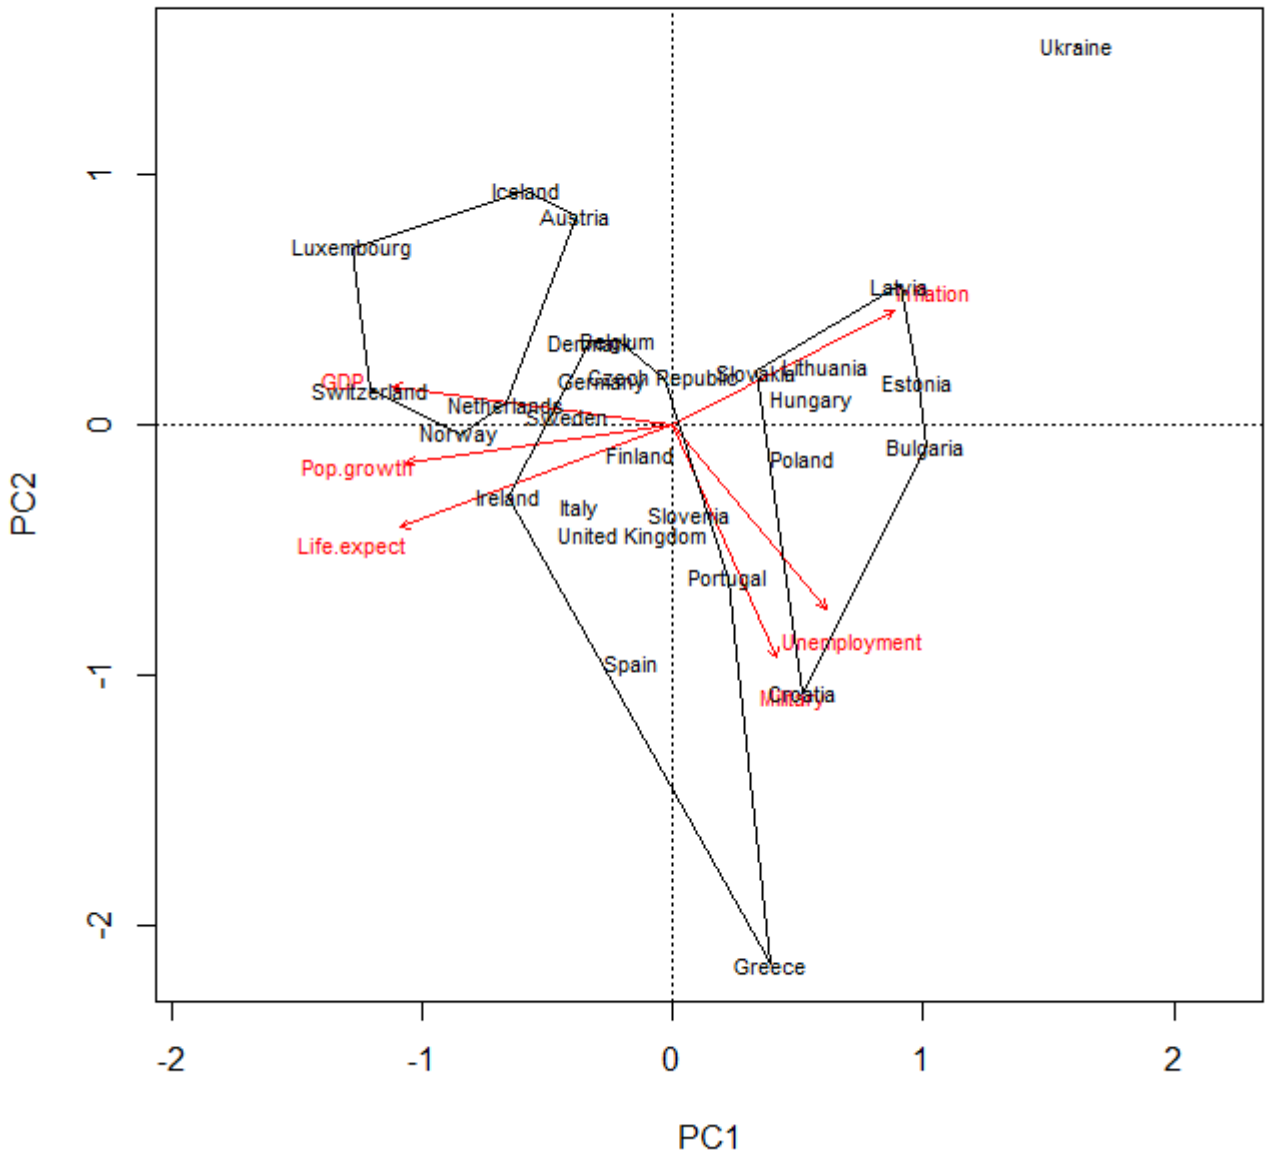

```
europe <- read.table ('europe.txt', sep = ',', row.names = 1, head = T)

klas <- hclust (dist (scale (europe)), method = 'complete')

plot (klas)
rect.hclust (klas, 4)

library (vegan)
pca <- rda (scale (europe))
plot (pca)
ordihull (pca, groups = cutree (klas, 4))
```
