Normal pig

Source of data

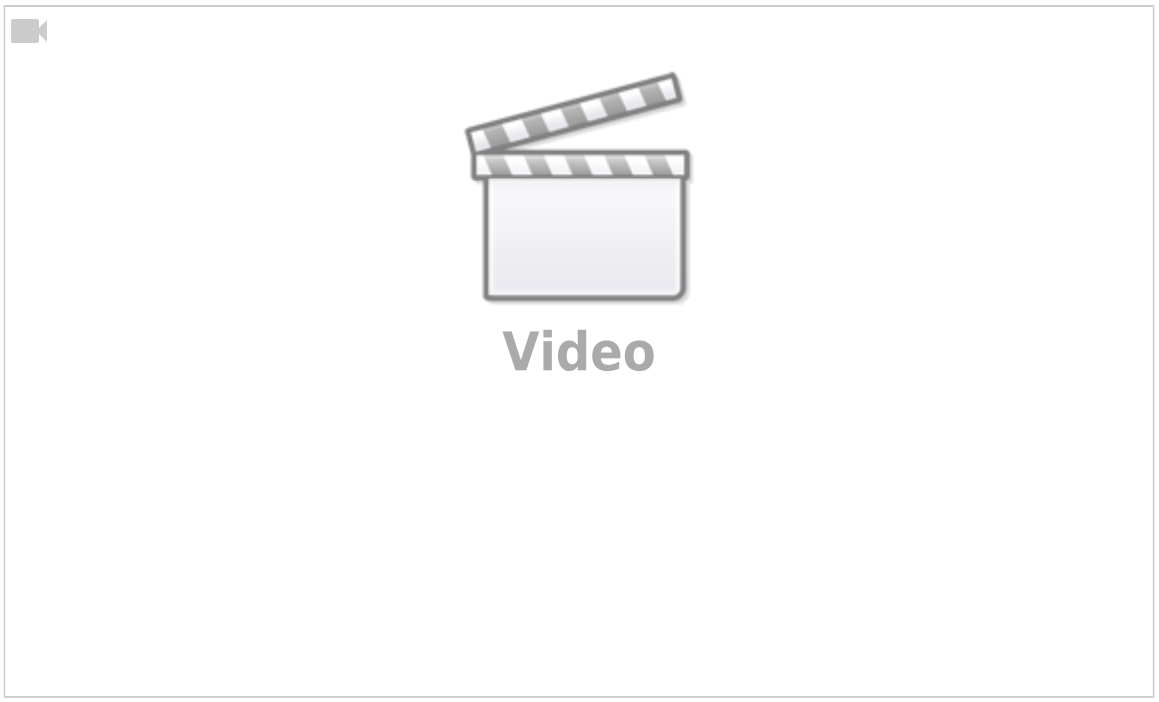

Hofmokl T. (1974) as cited by Czarnecki & Sokołowska (2015)[1)]

Description of the dataset

The “normal pig” is the original pig in the centre of the figure; it is then transformed by different transformation functions:

I took the normal pig and redrawn it in R, as in the video below:

Data for download

```
normal.pig <- read.delim
('https://raw.githubusercontent.com/zdealveindy/anadat-r/master/data/normal.pig.txt
')
right.skewed.pig <- read.delim
('https://raw.githubusercontent.com/zdealveindy/anadat-r/master/data/right-skewed.p
ig.txt')
```

[1)]
In fact, I didn't know where the pig comes from; I was using the figure from the presentation of my PhD supervisor Milan Chytrý, and could not find the source. Thanks to Bruno Hay Mele from University of Naples Federico II for sending me the references!
